

ILYAS ABDURAHMAN YUSUF

Senior Software Engineer — Fullstack developer with Frontend core

+6282264020976 | ilyasabdurahmanyusuf@gmail.com | Portfolio: ilyasuperglue.github.io | Indonesia

SUMMARY

Senior frontend developer (mobile, web) and backend developer with 6+ years of experience building consumer and banking applications in **React Native, Kotlin, Swift, Next.js, NodeJS, Laravel**. Specializes in real-time trading platforms and fintech products for regional banks across Malaysia, Indonesia, and Singapore, with a track record spanning full-stack delivery, IoT integration, and regulatory-compliant mobile development.

EXPERIENCE

Appfuxion Consulting — Software Developer

Nov 2021 – Present

IT consulting firm placing engineers at major regional banks. Continuous engagement across the following client placements:

Client: Maybank, Malaysia — Senior Frontend Developer (Jan 2026 – Present)

- Building the Maybank Trade App, a stock-broking mobile platform for Maybank Investment covering Malaysia, Indonesia, and Singapore, supporting real-time order execution.
- Delivering feature updates for MAE, Maybank's flagship consumer banking app, ensuring compliance with local regulatory and security requirements.
- Maintaining and extending M2u Biz, Maybank's business banking app, working across React Native and React JS codebases.

Technology: React Native, Kotlin, Swift, React JS, TypeScript

Client: Aeon Digital Bank, Malaysia — Senior Frontend Developer (Apr 2025 – Feb 2026)

- Shipped feature updates for the Aeon Mobile App using the latest React Native tooling, and maintained CI/CD pipelines for mobile builds.
- Built Aeon Web, a fully integrated web client in Next.js matching the mobile app's functionality, and maintained CI/CD for both the client and admin platforms.
- Developed and maintained new features for the Aeon Web Admin platform.

Technology: React Native, Kotlin, Swift, Next.js, TypeScript, CI/CD

Client: Maybank, Malaysia — Mobile App Developer (Feb 2023 – Mar 2025)

- Contributed to Maybank's core mobile applications ahead of the senior frontend role, building foundational React Native features later extended in the Trade App and MAE projects.

PT. Maju Berkah Adi Karya, Indonesia — Full Stack Developer

Dec 2020 – Nov 2021

- Built Juber, a super-app spanning a digital wallet and online payment system, marketplace, courier, food ordering, and driver modules, across mobile and backend.
- Developed the Juber Driver app with real-time routing that connected to the food, courier, and marketplace modules.
- Built a WebSocket backend to handle real-time chat, driver routing, and notifications across the Juber ecosystem.

Technology: React Native, Kotlin, Swift, Laravel, Node.js, Express, MySQL, PostgreSQL, Firebase

Brebes Government, Indonesia — Full Stack Developer

2019 – 2020

- Built an admin application for Brebes local government to manage regional law records.
- Built a companion public-facing app allowing citizens to search and view local regulations.

Technology: React Native, Laravel

LindungiHutan.com, Indonesia — Internship

2018 – 2019

- Supported development work as part of an early-career internship.

SELECTED PERSONAL & ADDITIONAL PROJECTS

- **Hydroponic Farm Automation** — IoT system with real-time sensor monitoring to automate and optimize hydroponic farm conditions (**React Native, Arduino C++, Node.js**).
- **Pavel Shoes Clean** — App for booking shoe-cleaning pickup and delivery (**React Native**).
- **Fuxion Spark** — Marketplace app for freelance gig postings and bidding (**React Native and SignalR**).
- **Tarbee** — Educational Quran learning app in the style of Duolingo (**React Native, and Supabase**).

SKILLS

TypeScript / JavaScript , React / Next.js, React Native, Kotlin, Swift, Node.js, PHP / Laravel, Rust, AI tools

EDUCATION

Universitas Harkat Negeri, Indonesia — B.S., Computer Science

Apr 2016 – Apr 2020

GPA: 3.55

- Final year project: IoT-based monitoring and automation application for hydroponic farming.
